

The Paper Rejection Repository

Nobody likes to receive a letter from the editor of your favorite journal letting you know that your paper was rejected. Some journals have begun including reviewers' comments with accepted papers to make the views of experts available to the reader. However, often the paper has been submitted to several journals and rejected before it is finally accepted. The rejection letters and comments are equally useful in helping to judge what kind of papers might be acceptable to a journal, and what kind of comments lead to rejections. Rather than hiding these low points in the trajectory of a scientific paper, this forum offers a place to publish these letters and comments to educate others.

If you would like to post your own rejection letters and comments, please log in (register on the page first), click on 'Upload rejection', fill in details requested on the form and attach a PDF containing all the material you would like to share. If you cannot answer the questions posed by the captcha on the registration page, please email **Nikolaus Grigorieff** for help.

Please remove any information that might be regarded as confidential and post only rejections of papers that were ultimately accepted by a journal.

For some background on this repository, please read our **blog post** on **F1000research.com**. The repository was also highlighted in posts on **Science Careers** and **The Scientist**.

Rejections

Posted On	Title	Rejected By ▲	Ultimately Published In
23 Jul 2010	The dynein regulatory complex is the nexin link and a major regulatory node in cilia and flagella	CELL	2009, J. Cell Biol. 187:921–933 @
18 Jul 2016	Ribosome•RelA structures reveal the mechanism of stringent response activation	Cell	2016, eLife 5, e17029 @
28 Jul 2010	Conformational changes in the C terminus of Shaker K ⁺ channel bound to the rat Kvβ2-subunit	EMBO J	2003, PNAS 100:12607–12612 @
28 Jul 2010	Visualization of the Domain Structure of an L-type Ca ²⁺ Channel Using Electron Cryo-microscopy	EMBO J	2003, J. Mol. Biol. 332:171–182 @
29 Jul 2010	Aβ(1-40) Fibril Polymorphism Implies Diverse Interaction Patterns in Amyloid Fibrils	EMBO J, PLoS, JBC, JACS	2009, J. Mol. Biol. 386:869–877 @
14 Sep 2012	Cryoelectron tomography reveals doublet-specific structures and unique interactions in the I1 dynein	J. Cell Biol.	2012, PNAS 109:E2067-76 @
22 Jul 2010	Near-atomic resolution using electron cryomicroscopy and single-particle reconstruction	Nature	2008, PNAS 105, 1867–1872 @
28 Jul 2010	Three-Dimensional Structure of Ito: Kv4.2-KCHIP2 Ion Channels by Electron Microscopy at 21Å Resolution	Nature	2004, Neuron 41:513–519 @
10 Jun 2014	Taura syndrome virus IRES initiates translation by binding its tRNA-mRNA-like structural element in the ribosomal decoding center	Nature	2014, PNAS @
16 Sep 2015	Peptide dimer structure in an Aβ(1–42) fibril visualized with cryo-EM	Nature	2015, PNAS @
